SKILLS

React, Redux, JavaScript, HTML5, CSS, Pug, Jinja, SQL, Postgres, Sequelize, SQLAlchemy, Python, Express, Flask, NodeJS, TDD, Docker, Git, QuickBooks, Adobe Photoshop, Spanish (limited working proficiency), Shopify, Computer Science, AWS

PROJECTS

OpenExotics (Flask, React, Redux, SQLAlchemy)

[live](#) | [github](#)

Implemented JavaScript and Python to clone OpenTable catered towards exotic car dealerships

- Developed user authentication with a Python / Flask backend & JavaScript / React frontend to allow users to login/signup.
- Styled complete application using raw CSS for a streamlined UI / UX design while complying with best practices.
- Constructed frontend routes using React / Redux / Hooks to render individual components.

Whatsforlunch (Flask, React, Redux, SQLAlchemy)

[live](#) | [github](#)

Clone of Instagram with a foodie twist using JavaScript and Python

- Implemented user authentication and validators in the backend using FlaskForm to render errors when data is required.
- Constructed a Flask / SQLAlchemy database to add users, posts, and comments tables.
- Designed the logo using Adobe Photoshop and incorporated it to the app's different pages using raw CSS to format.

WouldReads (Pug, Express, Sequelize, Node.js)

[live](#) | [github](#)

Using JavaScript, allows users to select books and add to bookshelves they have or would like to read

- Executed backend user auth using express-validators to show custom errors for each input when not entered appropriately.
- Designed a custom logo with Adobe Photoshop and used CSS to style and incorporate it into the navigation component.
- Collaborated with team members on a Sequelize database to create tables and establish relationships amongst them.

EXPERIENCE
